Step 1: Get to the CP Portal
Visit our homepage to get to the CP Portal: http://www.claudiuspeters.com/en-GB
Click on one of the CP Portal tabs.

You will now find the button "Register" on the right-hand side.

Once you have arrived in the CP Portal login area, start your registration.
Step 2: registration process

Fill in the registration form.
To be able to log in with your own profile in the future, define your user data. Since the Claudius Peters Portal is a pure customer platform, we ask for your understanding that only company e-mail addresses can be accepted.

In order to be able to assign the data relevant to you, we require profile data with details of responsibilities and plant specifications.

Finally, please confirm the Authorization and Privacy Statement. You will find the privacy policy attached if you wish to review it.
Now you can finish the registration with a click on “Register”.

Once you have registered, you will receive a confirmation email with a link to activate your account. At the same time, we will receive an email about your new registration so that we can assign the relevant customer data to your account.
You will then be notified about the update of your account. During the approval process you already have access to the demo catalogs to get an idea of the portal.
Your data security is important to us. For this reason, you will be asked to enter a six-digit code in addition to your password each time you log in. This code will be sent to your e-mail address beforehand.
We thank you for your registration and we hope you enjoy the CP Portal.
